

FIBREGLASS PLANTERS

Product description

The upper edge of these planters is reversed twice, which gives these planters a splendid timeless appearance. The planters are manufactured with high-quality reinforced Fibreglass. Because the reinforcement has been extended into the corners, these corners cannot tear out. The planter is coloured through the entire material and will therefore retain its colour. As standard all fibreglass planters are supplied in RAL 7021 (high gloss RAL 9016).

SPECIFICATIONS

General information

Our planters consist out of:

- Double folded top edge
- Material thickness: 3 mm
- Reinforcements against deformation
- 5 year warranty (descending)

Options

- Wheels (not all models)
- Coating in 7 RAL-colours
- Overflow pipe

Colours

Stock colours

- Fibreglass: RAL 7021
- Fibreglass glossy: RAL 9016

Fibreglass planters are also available in RAL colours: 7006 | 7016 | 7035 | 9005 | 9010 | 9016 (10% colour surcharge).

IMPORTANT

Points of attention

- All packaging materials must immediately be removed from the products.
- **Note!** Always drill drainage holes in the bottom of the planter, use (if present) the raised parts of the bottom of the planter.
- Watertight planters are not suitable for pond application.
- Our planters are not suitable to be moved once filled.

Maintenance

- Clean at least 2x per year. Rinse the planter with clean tap water to remove dirt (Do not use a high-pressure cleaner!) Spray the ADEZZ BIO cleaner/protector on the outside of the planter (100% biodegradable). This ensures all dirt is drawn out of the pores. Rinse with clean tap water again. After this apply the ADEZZ BIO cleaner/protector again on the planter to protect your planters against dirt.
- **Note!** Do not use a high-pressure cleaner or abrasive sponge.
- Adezz maintenance products are available (page 5).

PLACEMENT

PLACEMENT

1. Provide a flat, solid surface. If not done carefully, it can create tension in the product which can result in damage to the product.

Note! Always drill drainage holes in the bottom of the planter, use (if present) the raised parts of the bottom of the planter.

2. If desired, install an overflow pipe in the designated place at the bottom of the planter to create a water reservoir.

3. Reinforcement ribs in planters are essential for the construction and dimensional stability of the planter. These must never be removed!

4. Always provide sufficient breathing space (minimum 1 cm) around the planters to prevent moisture trapping.

PLANTING ADVICE

5. Fill the planter with a layer of hydro grains about 10cm high. Place a moisture-permeable anti-root cloth over the hydro grains.

Note! Raise the cloth at the edges at least 10 cm for an ideal effect.

6. Cover the anti-root cloth with a layer of airy soil mixture adapted to the planting to be applied.

Note! The soil in the planter should never be tamped down, this can cause damage to the planter.

INSTALL WHEELS

1. Wheels are supplied separately with the planter. Assembly is very easy, see images on the right.

2. Position the wooden board with the four large holes upwards and press the carriage bolts firmly all the way in (see detailed picture).

3. Then slide the wheel over the bolt and tighten it with the supplied nut.

4. Then place the wooden board with wheels under the planter, they do not need to be connected to each other.

ACCESSORIES

ACCESSORIES

All our accessories meet the highest standards and are an highly suitable addition to our products. Visit www.adezz.com for a complete overview of our accessories.

CLEANER & PROTECTOR

We recommend cleaning our products at least twice a year. For optimal results, use the ADEZZ BIO Cleaner & Protector. Always read the descriptions on the packaging carefully before use.

WHEELS

Wheels are an option on many of our products. Check www.adezz.com for the options per product (Total load capacity 450kg).

OVERFLOW PIPE

Overflow pipes provide a water buffer at the bottom of the planter and fit into the standard drainage holes, making them easy to install.
