BANDU

BANDU

This sustainable planter is characterised by the variety of board widths used in its construction. Thanks to the recessed base, the BANDU appears to float, giving it a graceful appearance.

Material bamboo

Bring a sustainable element into your garden with our BANDU: a planter made of bamboo. The natural appearance of bamboo will look beautiful in any garden. To help the bamboo retain its dark brown colour, treat with a protector once a year. If left untreated, the bamboo will develop a natural grey colour, which will also look lovely in your garden. The varibo pattern gives this planter character.

Bamboo is becoming increasingly popular as an element in gardens and this is reflected in our products. It is an excellent alternative to tropical hardwood. This is because bamboo grows much faster than hardwoods and can therefore be harvested much sooner. Tropical hardwood forests take 60 to 120 years to regenerate after being felled, while bamboo takes only 4 to 6 years. The plant regrows quickly – so quickly, in fact, that it is necessary to cut it back regularly.

SPECIFICATIONS

- 5-year guarantee.
- Bamboo is a natural, sustainable, strong material with a long lifespan.
- The standard thickness of the bamboo is 20 mm, and the rim panel is 40 mm thick.
- The base is 90 mm high and recessed by 58 mm.
- Unlike other woods, bamboo shrinks and swells very little.
- If left untreated, bamboo will turn grey naturally as it ages. This colour change is caused by UV radiation.

KEY POINTS TO NOTE

- Products should be unpacked immediately upon receipt to release any moisture trapped inside the packaging. If the product is left in its packaging, it may develop patches of uneven discolouration.
- Note: To preserve the dark brown colour of the bamboo, treat the planter with a protector immediately after placement.
- The guarantee expires if you drill or grind in a way that is not specified.

Placement

1. It is important that the product is positioned on a firm, levelled surface. If the ground is not level, the weight of the planter will be unevenly distributed. This can cause stress damage.
2. Reinforcement ribs in planters provide essential structural stability and help them to retain their shape. These should never be removed.
3. Always provide enough space around the planter (at least 1 cm) to prevent moisture from becoming trapped near its surface.

Planting advice

1. Cover the bottom of the planter with about 10 cm of hydro pellets.
2. Place a permeable anti-root membrane over the drainage material.
3. Cover the membrane with soil suitable for your chosen plants.

Maintenance

We use MOSO Bamboo X-treme to make our BANDU planter. The BANDU requires no maintenance. In fact, without maintenance, MOSO Bamboo X-treme will develop a beautiful, natural grey colour.

If you prefer to maintain the bamboo's dark colour, treat the planter annually with a protector. We recommend Woca Exterior Wood Cleaner & Oil. This product cleans and protects bamboo. The planter should be treated immediately after placement.

- 1.** Soak the planter with water and wait 10 minutes. If possible, use a garden hose.
Warning! Do not use a high-pressure cleaner. This can damage the bamboo.
- 2.** Mix 1 part Woca Exterior Wood Cleaner with 2 parts water and apply with a soft cloth or sponge. Be sure to remove any dirt from the planter.
Warning! Do not use a scouring pad or hard brush. This can damage the bamboo.
- 3.** Allow the planter to dry. Do not apply the oil until the planter is completely dry.
Warning! Apply the oil only in dry weather, avoiding direct sunlight and high temperatures.
- 4.** Stir the oil well before using. Use a brush to apply a thin, even coat of oil.
- 5.** The oil has a creamy appearance when it is first applied. After a few minutes, the water will evaporate, and it will look more like an oil.
- 6.** Leave the oil to soak in for 5 to 10 minutes, then buff off the excess with a cotton cloth.
- 7.** Repeat these steps again.
- 8.** The oil will cure in 24 to 48 hours, depending on weather conditions.
Warning! It is important that the planter is not exposed to water during this time.

ADEZZ

DESIGN TO GROW

Spending time outdoors has soared in popularity over the last few years, becoming an increasingly important part of our daily lives. Our brands ADEZZ, FORNO and FURNS offer a diverse range of products guaranteed to enhance the outdoor experience. Our collections create an ambience in which you can enjoy your garden to the fullest.

All brands have their own character, but they are designed to work together, allowing you to create endless combinations. The materials, finishes and styles are repeated across the collections so that they coordinate beautifully. The result? A long-lasting, stylish garden design: from sleek edging to exclusive furniture and from sturdy fireplaces to elegant water tables.

We design and manufacture all our products in-house, ensuring that we can continue to provide the high quality that you have come to expect from us. And we do this at the most competitive price possible. All our products are made in Europe with the utmost care, so we can be sure that they meet our exacting standards.
